

# Algebra 1 Study Instructions for Exams

The schedule below is an example. Remember, three semesters of credit are earned in this course. If your student needs a few extra days to prepare for the exam, please give it to them. But don't spend more than two weeks on each exam.

## Day 1

- Review the Rules and Definitions flashcards for this exam linked on the Exam page. Spend 10-15 minutes on this.
- Retake all quizzes for the current quarter (Do not retake Quiz 1). This will not change your grade. Only the first attempt is recorded. Don't just click on the right answers and call that "studying," it's not. **Put your pencil to the paper and solve each problem again.** Remember, math is an activity, so involve your mind and your body in it. Re-learn and correct missed problems by following the steps on the Quiz Instructions.

## Day 2

- **Print the** [Instructions for Practice Exams](#)
- **Take Practice Exam 1** (linked in the eLearning course) **If the practice exam is not completed, a 0 is recorded in the grade book.**

## Day 3

- **Use the** [Instructions for Practice Exams](#)
- **Take Practice Exam 2** (linked in the eLearning course)
- The Practice Exams count as a Practice Set. **If a practice exam is not completed, a 0 is recorded in the grade book.**

## Day 4

- **Print the** [Instructions for Taking Quarterly Exams](#)
- Take Quarterly Exam - Time Limit: 1 hour and 15 minutes (linked in eLearning course)
- Correct Exam attempt 1 according to Quarterly Exam Instruction Sheet.

## Day 5

- Optional: To improve your score, take the Exam again and the scores are averaged. Follow these steps: [Instructions for Taking Quarterly Exams](#)
