

## Student Scored Less than 80% in Saxon 87

**If your student didn't finish the last 30 lessons or failed Saxon 87:** Either use Shormann Pre-Algebra self-paced eLearning course or use this [Remediation Plan for Saxon 87](#). Our new [Shormann Pre-Algebra self-paced eCourse](#) features interactive assignments with automated grading and grade recording.

### All others, follow these steps:

Instead of repeating all of Math 8/7 or spending money on a different pre-algebra course, it is more efficient to repeat specific assignments in Math 8/7 as directed below. Then, the student can go directly to Algebra 1. Students who take Algebra 1 after mastering Math 8/7 do better than students who take a non-Saxon or Shormann pre-algebra course. If you think your student needs to repeat 8/7 over, [follow these steps](#) or you may want to consider our new [Shormann Pre-Algebra self-paced eCourse](#) which features interactive assignments with automated grading and grade recording.

#### 1. Does the student know all multiplication facts to 9 within 3 seconds or so?

**Yes:** Go to next question.

**No:** If beyond lesson 30, stop the Saxon course. Make flashcards for all facts the student doesn't know. Work on these, a few at a time, until they are all memorized. Then go to next step. See Prerequisite on page 1 of this guide.

#### 2. Complete the Facts Drills below as instructed on this document: [Instructions for Saxon 8/7 Facts Drills](#) Then, go to the next step.

#### 3. Read the Tips for Success and print page 7 of the Teacher Guide.

#### 4. Starting with the first test (of 19-23) with less than 80%. Do the following:

#### 5. Take Test 19:

**Less than 80%: Go to step 6.**

**80% or higher:** Correct each missed problem on the test following the steps on the Daily Schedule. Take Test 20. Continue this method unless the student scores less than 80% on a Test. If that happens complete the step 6 based on the test number below:

Test 20- Lesson 95

Test 21- Lesson 100

Test 22- Lesson 105

Test 23 Lesson 110

#### 6. Starting with the lesson listed above, complete each lesson as directed on the Daily Schedule on page 8 of the Teacher Guide. **Except, in the Mixed Practice section only do odds or evens.** On odd numbered lessons work only the odd numbered problems. On even numbered lessons work even numbered problems.

#### 7. Be sure to do the assigned Facts Practice drill for each lesson in step 6.

#### 8. Give the tests as scheduled on page 8 of the Teacher Guide. Do the assigned Facts Drill listed on the Tests.

#### 9. Correct the test as directed on the Daily Schedule. If the student still scores less than 80%, contact us ASAP.

#### 10. Continue this process until all lessons and tests have been completed.
