

Instructions for Completing Practice Sets Offline

Algebra 1 - Calculus 2 Hybrid Method

Parent Instructions

1. Download the Practice Set Booklet:
 - Login to the course using the student's login credentials..
 - Open the Course, select "Parent Setup", scroll down to "Important Resources", and select "Textbooks".
 - Print the booklet
2. For grading, we recommend having the student enter the answers in the eLearning course for grading so they can use the Help links and video solutions to quickly relearn forgotten concepts. This is critical to developing fluency which makes learning faster and easier! If they don't relearn, students develop gaps which make math harder and harder.
3. Alternatively, parents can manually grade the Practice Sets using the Solutions Manual. If you plan to grade manually, request a PDF of the solutions manual by sending a request to support@diveintomath.com. Include your name, the student's username, and course title.
4. If you are concerned about guessing, before allowing students to enter their answers online, briefly compare their handwritten work against the solutions manual to ensure they have solved problems on paper.
5. After the student completes step 5 in the Student Instructions below, compare their Corrections notes against the solutions manual to ensure they followed all the steps in #5.

Student Instructions for Offline Practice Sets

1. Login to the eLearning course and navigate to today's lesson number.
2. Complete the Rules & Definitions and watch the video lecture for this lesson.
3. Do the Practice Set
 - i. Open the Practice Set Booklet to today's lesson.
 - ii. Start a new page in your notebook titled, "Lesson __ Homework Notes".
 - iii. Show your work by solving each math problem on paper.
 - iv. If you can't solve one, watch the video lesson for the lesson number in parentheses next to the question. Then, fast-forward to the example problem like the one you are stuck on.
 - v. If you still can't answer it, write the question number on your notes and circle it. Then, go to the next question. You will re-learn it in the "Corrections" step below which is much more efficient than "researching" it.
4. Grade and Relearn Missed Problems
 - i. If a parent manually grades your assignment, skip to Step 6.
 - ii. Login to the eLearning course and open the Practice Set.
 - iii. Enter your answer and select submit. If you don't know the answer, use the help links above the question and try again.
 - iv. If it's wrong, use the help links above the question.
 - v. If you still can't answer, skip it and go to the next question.
 - vi. Answer all the questions you can, then submit the assignment.
 - vii. Follow the steps below to correct missed problems.

5. Correct Missed Problems

- i. If a parent graded the assignment, open and submit the practice set. If not, go to the next step.
- ii. The Results page is displayed.
- iii. Select “Relearn & Correct ...” in the “Feedback” field and follow those steps.
- iv. Show your corrections to a parent.

6. Regardless of the score, do not retake practice sets unless you have a technical issue. The practice sets are like baseball or piano practice where you learn new skills and are expected to make mistakes. To compensate for that, they are a very small percentage of your grade. The most important step is to fix your mistakes by following the steps above.

- i. [My student consistently scores below a 70 or 75 on Practice Sets](#)
- ii. [My student failed or scored too low on an assignment.](#)
- iii. [How to Raise the Final Grade](#)

Instructions for Quizzes & Exams

Login to the eLearning course to study and take the Quizzes & Exams. The exams should be done under parent supervision and require very low internet speed.
